VADIVELU LOKAIAH THULASIRAM

Junior AI Research Associate | Python Full Stack Developer | Cloud Application Developer

+91-7569854797 vlthulasiram.23@gmail.com LinkedIn Portfolio GitHub Chittoor, AP

SUMMARY

Computer Science Engineering graduate and **Junior AI Research Associate** with hands-on experience in **Artificial Intelligence, Python, Generative AI, LLMs, RAG, Agentic AI, and Cloud Computing**. Experienced in developing **AI-powered applications, REST APIs, intelligent automation solutions, and full-stack applications** using Python, FastAPI, React.js, Node.js, and modern AI frameworks. Hands-on exposure to **AWS EC2, S3, IAM, Lambda, and serverless deployment** through AI and cloud projects. Strong foundation in **Machine Learning, NLP, API development, databases, and software engineering**, with a focus on building practical and scalable AI solutions.

EDUCATION

Sreenivasa Institute of Technology and Management Studies - CSE
Bachelor of Technology, Chittoor — CGPA - 7.82 — **2022 - 2026**

Narayana Junior College
Intermediate Education, Chittoor — 61% — **2020 - 2022**

ZP High School
Secondary Education, Yadamari — 87% — **2018 – 2020**

EXPERIENCE

Junior AI Research Associate | ROOMAN Technologies · StartupVarsity — Bengaluru, India
Aug 2026 – Present | Hire → Train → Deploy (HTD)

- Selected for ROOMAN's **Hire–Train–Deploy (HTD) program** and trained in **AI application development, Python, LLMs, RAG, and Agentic AI frameworks**.
- Develop and test **AI-powered applications and features** for internal, client, tender, and StartupVarsity projects.
- Gain hands-on experience deploying applications using **AWS EC2 and S3**, including cloud hosting and storage.
- Work with **AWS IAM** for users, roles, policies, and permissions while contributing to practical AI and cloud-based solutions

PROJECTS

Knowledge-Assisted Diagnosis of Failures in Jupyter ML Environments
Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning
- Developed an intelligent debugging system for analyzing failures in Jupyter Notebook environments
- Analyzed runtime exceptions such as dependency conflicts and execution errors
- Built a diagnostic layer to interpret stack traces and improve system reliability
- Visualized crash patterns to identify recurring issues and optimize debugging

Cloud-based File Management System
Tech Stack: React.js, Node.js, Express.js, MongoDB, AWS
- Developed a scalable cloud-based file management system
- Implemented secure file upload, download, and storage features
- Designed responsive UI for improved user experience
- Integrated REST APIs for seamless backend communication

AI Meeting Notes to Action Items Generator
Tech Stack: Python, FastAPI, React, LLM, REST API
- Developed an AI-powered application that converts meeting transcripts into concise summaries.
- Extracted action items, task owners, deadlines, and priorities using Large Language Models.
- Built REST APIs using FastAPI for AI inference.
- Integrated AI models for intelligent text understanding and automation.

Smart File Organizer System

Tech Stack: Python

- Developed an automated file organization system
- Implemented directory scanning and categorization logic
- Improved file management efficiency through automation

INTERNSHIPS & CERTIFICATIONS

Cloud Application Developer - JNTUA Summer Internship **05/2025 - 07/2025**

Rooman Technologies Pvt., Ltd., Bangalore

Completed government-sponsored internship in collaboration with IBM, IIT Guwahati, NSDC, NASSCOM, and Wadhwani Foundation. Training delivered via Rooman Interleap LMS, covering 15 modules and 77 topics, including: Cloud Architecture, REST APIs, Authentication, Serverless Computing, and DevOps Practices.

- Developed and deployed applications using AWS EC2 and Lambda
- Managed IAM roles and policies for secure cloud access
- Built and tested REST APIs for scalable systems
- Implemented monitoring and alerting for cloud infrastructure

Python Full Stack Intern **11/2025 - 03/2026**

Sri Vensy Technologies Pvt. Ltd., Tirupati

- Developed backend modules using Python for business workflows
- Integrated SQL queries for efficient data storage and retrieval
- Implemented API logic and validated request/response data
- Debugged backend issues and optimized application performance

Python Developer Intern **06/2025 - 06/2025**

UniConverge Technologies Pvt. Ltd. (Upskill Campus)

- Built automation tools for file management and organization
- Developed secure password storage systems
- Designed interactive applications with efficient logic handling

CERTIFICATIONS

- ✓ **Junior AI Associate Hackathon 2026** – ROOMAN Technologies
- ✓ **Cloud Computing** – NPTEL (12 Weeks)
- ✓ **Fundamentals of Robotics** – IIT Delhi
- ✓ **Analyzing and Visualizing Data with R** – (edX)

TECHNICAL SKILLS

Programming	: Python, Java, C
Artificial Intelligence	: Generative AI, Prompt Engineering, AI Agents, NLP Fundamentals
Web Development	: HTML, CSS, React.js, Node.js, Express.js
Cloud & DevOps	: AWS (EC2, Lambda, IAM, S3), Serverless Architecture
Databases	: MongoDB, SQL
Tools	: Git, GitHub, VS Code, Tableau, Excel
Concepts	: REST APIs, OOP, Data Structures, Authentication, API Development

LANGUAGES

TAMIL – Native ENGLISH – Intermediate TELUGU – Proficient

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge. I take full responsibility for the authenticity of the details mentioned.
