VADIVELU LOKAIAH THULASIRAM

B.TECH FINAL-YEAR STUDENT

+91-7569854797 vlthulasiram.23@gmail.com LinkdinProfile Portfolio Yadamari - AP 517128

SUMMARY

I am a dedicated and intelligent Computer Science and Engineering student, eager to gain practical experience and contribute to impactful projects in the technology sector. With strong skills in programming and problem-solving, I am committed to continuously learning and applying my technical knowledge to solve real-world challenges effectively.

EDUCATION

Sreenivasa Institute of Technology and Management Studies
Bachelor of Technology, Chittoor — CGPA - 7.73 — **2022 - Present**

Narayana Junior College
Intermediate Education, Chittoor — 61% — **2020 - 2022**

ZP High School
Secondary Education, Yadamari — 87% — **2018 – 2020**

PROJECTS

Knowledge-Assisted Diagnosis of Failures in Jupyter ML Environments **open GitHub**

Developed a crash analysis and intelligent debugging system for Python-based notebooks in Jupyter Notebook. Analyzed runtime exceptions including dependency conflicts, execution-order errors, and ML API misuse. Used Pandas, NumPy, Matplotlib, and Seaborn for preprocessing, statistical analysis, and visualization of crash patterns. Built a knowledge-assisted diagnostic layer to interpret stack traces and improve notebook reliability.

Cloud-based File System

A serverless solution ensuring scalability and efficiency for cloud-based file management Developed a cloud-based file management system using React.js, Node.js, Express.js, MongoDB, and AWS Enabled users to securely upload, preview, download, and delete files and folders with a responsive UI

To-Do List API

Simple yet powerful RESTful API for managing tasks and productivity. Built during cloud computing internship with proper authentication and data management.

Smart File Organizer System

Developed an automated file management system that scans directories, categorizes files by type, and organizes them into structured folders. Implemented efficient file handling and directory automation using Python.

Secure Password Manager

Built a secure password management application with encrypted storage and strong password generation. Designed user-friendly interfaces and implemented secure data handling mechanisms.

Interactive Quiz Game Application

Created a dynamic quiz application with real-time score tracking and question management. Integrated file/database storage for efficient retrieval and performance evaluation.

INTERNSHIPS & CERTIFICATIONS

Cloud Application Developer - JNTUA Summer Internship **05/2025 - 07/2025**
Rooman Technologies Pvt., Ltd., Andhra Pradesh
Completed government-sponsored internship in collaboration with IBM, IIT Guwahati, NSDC, NASSCOM, and Wadhwani Foundation. Training delivered via Rooman Interleap LMS, covering 15 modules and 77 topics, including: Cloud Architecture, REST APIs, Authentication, Serverless Computing, and DevOps Practices.

- Managing IAM policies for IT development.
- Implementing MP3 notification system.
- Deploying web servers on AWS EC2.
- Monitoring infrastructure and setting up alerting.
- Deploying scalable Nginx on ECS.
- Developing a simple To-Do List API.

Python Full Stack Intern Ongoing Internship **11/2025 - 03/2026**

Sri Vensy Technologies Pvt. Ltd., Tirupati

- Integrated SQL queries for data storage and retrieval
- Developed backend modules using Python for business workflows
- Implemented API logic and validated request/response data
- Debugged backend issues and optimized application logic
- Collaborated with frontend team to ensure smooth data flow

Cloud Computing – NPTEL

12-week Certified Course **07/2025 - 10/2025**

- Introduction to Cloud Computing
- Cloud Computing Architecture
- Data Management in Cloud Computing
- Open Source, Cloud Simulator
- Research trend in Cloud Computing
- VM Resource Allocation, Monitoring
- Serverless Computing and FaaS Model
- Case Studies and Recent Advancements

Python Developer Intern **06/2025 - 06/2025**

UniConverge Technologies Pvt. Ltd. (Upskill Campus)

- Built automated file categorization and organization system
- Implemented directory scanning and folder creation logic
- Developed secure password storage with encryption
- Designed interactive user interfaces
- Created quiz logic with score tracking
- Integrated database/file handling for data storage

Fundamentals of Robotics - IIT Delhi **12/2023 – 12/2023**

Zeekers Employment Pvt. Ltd.

- Demonstrated robotics concepts through hands-on activities
- Utilized Arduino Uno for practical implementation using Python programming
- Designed and developed a robot car as part of applied robotics learning.

Completed a 5-days Skill Development & Entrepreneurship Training Program on Fundamentals of Robotics

SKILLS

AWS, Cloud Computing, AWS Lambda, DynamoDB, HTML, IBM, Java, Python, Robotics, Serverless, Tailwind, Node.js, C, DBMS, SPSS, Tableau, Excel, React.js

LANGUAGES

TAMIL – Native ENGLISH – Intermediate TELUGU – Proficient

DECLARATION

I hereby declare that the information provided above is accurate and complete to the best of my knowledge and belief.
